EDUCATION

QA Engineering
Software University

01/2023 - 08/2024   *Sofia*

Courses

- **QA Fundamentals & Manual Testing** - Fundamental knowledge of software development and testing principles, along with deep understanding of different testing techniques aimed at ensuring that software products meet specified requirements and quality standards.

- **Back-end Test Automation** - Developed and implemented automated tests using C# and JavaScript ensuring reliability, performance and functionality of back- end systems by automating tasks like data validation, API testing, CI/CD pipelines and database verification.

- **Programming Advanced for QA** - Working with advanced programming concepts including design patterns, data structures, algorithms, testing frameworks, and software architecture by mastering OOP principles, as well as unit and integration testing.

- **Front-end Test Automation** - Scripted and executed automated tests to validate user interfaces across web and mobile platforms by using testing frameworks like Selenium WebDriver and Appium to ensure cross-browser and cross-device compatibility.

Informatics and Information Technologies
1st High School Pencho Slaveykov

09/2002 - 05/2006   *Sofia*

Courses

- **Informatics** - Information processing and its application in computational and automated systems, computer science and software engineering

- **Information Technologies** - Application of computers and telecommunications to store, retrieve, transmit, and manipulate data for business needs
